Interactivity at its Core Equipped with a double communication protocol, the Fuoripista Bike interacts with various devices and platforms, including ELITE's My E-Training software and other indoor cycling apps. Whether you're using iOS, Android, MacOS, or Windows, this bike ensures a wireless connection for up to 10 hours of uninterrupted training.

Intuitive Interface Navigating through the bike's features is effortless thanks to its user-friendly display located at the center of the handlebar. From connectivity settings to power levels and brake calibration, everything is easily accessible. Additionally, an emergency button provides added safety by temporarily locking the flywheel when needed, while a tablet support feature enhances the overall experience.

Virtual Shifting and Precision Power Measurement The Fuoripista Bike offers a virtual shifting experience with two levers that adjust resistance, simulating gear shifts for a more immersive ride. Moreover, its magnetic technology power meter ensures accurate power output measurement, thanks to an ergometer placed in the bottom bracket axle.

Technical Specifications Featuring a maximum simulated gradient of 12% and up to 16 resistance levels, this bike offers a wide range of workout intensities. With a power output measurement accuracy of ± 2.5% and a rechargeable lithium battery providing 10 hours of operation, the Fuoripista Bike sets the standard for indoor cycling equipment. Plus, it seamlessly interfaces with all devices, operating systems, and software platforms, making it a versatile choice for fitness enthusiasts worldwide.
