MIA / MIA THERMO

SAFE AND SANITARY, 100% STAINLESS STEEL

MIA is the Elite water bottle entirely made of stainless steel, from top to bottom. Stainless steel is long-lasting, rustproof and easy to wash. Just fill the bottle with hot water and a drop of neutral detergent, shake it, empty it, rinse it and let it dry.

Totally BPA-free (Bisphenol A), AISI 304 stainless steel is completely recyclable and food safe according to current legislation.

IT TAKES A FINGER

This bottle comes with a practical steel screw cap that ensures perfect air-tightness even without making use of plastic seals. In fact, MIA is completely plastic-free.

The bottle is easy to carry with a nice steel loop handle so you can use a single finger to carry it around.

FOR ALL BIKES

MIA and MIA THERMO are compatible with all commercially available bottlecages. The external bottle diameter, 73 mm on the base, ensures a universal fit on any bottlecage.

IN TWO VERSIONS

MIA is available in two versions. The standard MIA 650 ml bottle is made with a single container and it's non-thermal.

MIA THERMO 550 ml is made of two containers welded together to keep liquid hot or cold. Between these two containers, there are stringent vacuum conditions that make it possible to create a thermal gap.

These water bottles are perfect to match the frame of your bike and bottle cage, or to be carried around with you every day, in your office and at the gym.

MIA 650 ml is available in four colours: black, black and silver, beige and green. MIA THERMO 550 ml is available in two colours: black and silver, green and silver.
