TUO

ATTRACTIVE DURING USE, ELEGANT WHEN FOLDED

Style and performances, elegance and quality. Its minimalist architecture is the perfect solution for your bicycle workouts. This is TUO, the indoor workout home trainer, interactive, wheel-on and with automatic resistance adjustment.

A reliable and technological companion to bring workouts to a higher level and at the same time it's a sophisticated piece of furniture. It's the ideal addition to your house, during workouts and after.

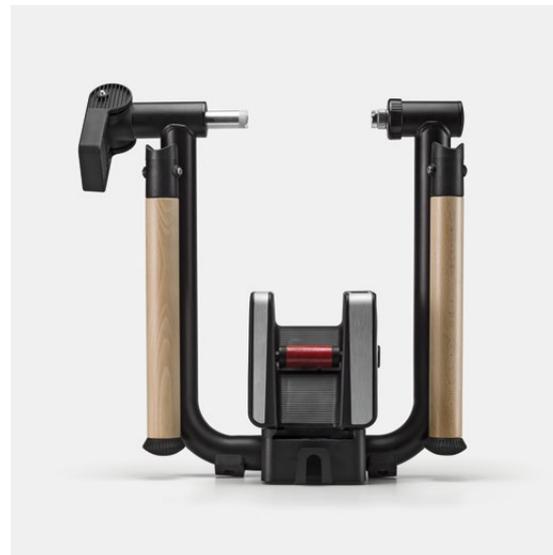

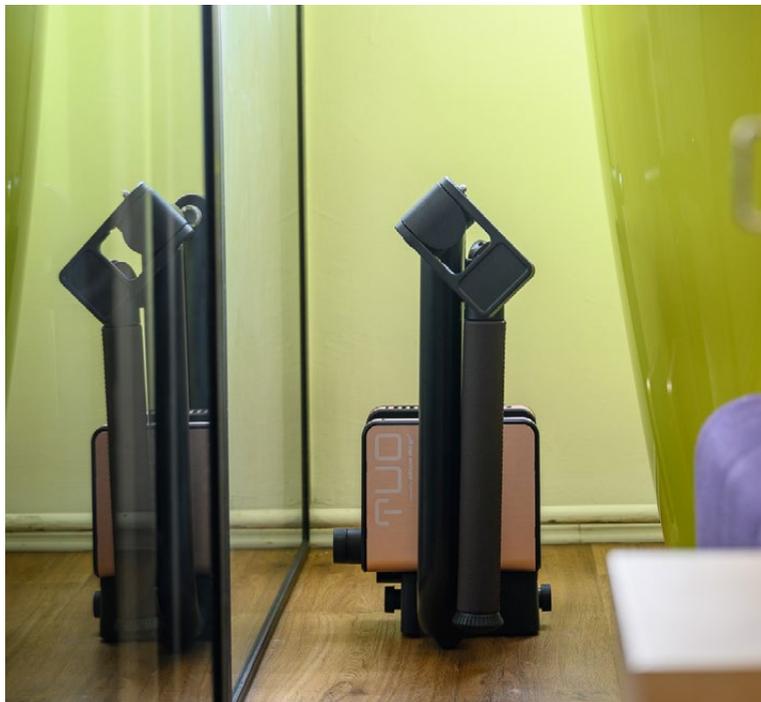

STURDY AND COMPACT

The home trainer features a sturdy and compact structure with metal frame and beechwood legs, often used in the interior design sector.

It's perfect to absorb shocks and strains while working out yet ensure great stability thanks to the anti-slip rubber feet.

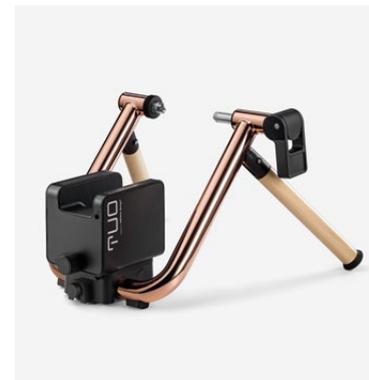

TUO folds easily for an easy setup and small footprint under any circumstance.

LIGHT AND COMPATIBLE

Very light and easy to transport (just over 10 kg), TUO features a frame that can accommodate bigger-sized chainstays.

You'll be able to position the unit for race bicycles and mountain bikes with wheels from 26" up to 29". TUO is compatible with bicycles with 130x5mm hubs with Quick Release up to bicycles with Boost thru-axle with 148x12mm hubs.

MAGNETIC TECHNOLOGY

TUO is a home trainer with electronically-managed magnetic resistance that replicates your outdoor workouts by ensuring great pedalling roundness and a wide range of power output levels, up to 1300 Watts at 40 km/h.

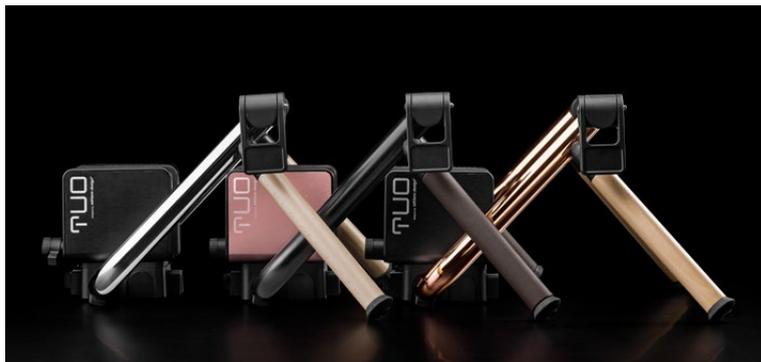

The roller on which the wheels rests on is made in Elastogel, an exclusive Elite-developed polyurethane molecule that reduces noise by 50% and tyre wear by 20%.

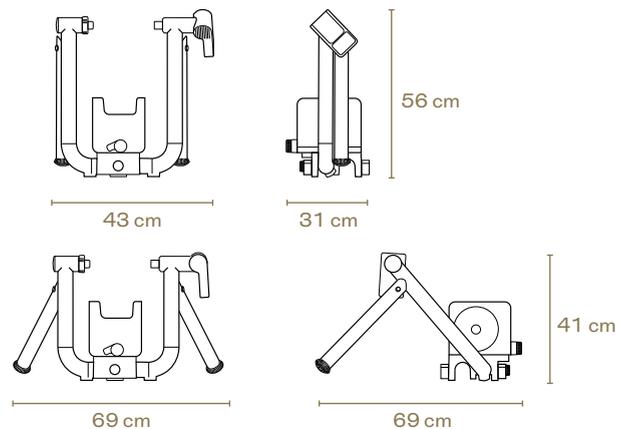

TOTAL INTERACTIVITY

Thanks to the double ANT+ FE-C and Bluetooth communication protocols, TUO is a totally interactive home trainer that connects to any kind of app, software, computer, smartphone, and tablet terminal via iOS, Android, Mac and Windows in order to have total customization and interactivity on your indoor workouts.

TUO includes 12-month subscription to the Elite-developed My E-Training software, to create custom workouts programs, evaluate your functional threshold power (FTP) and have fun by working out on real videocourses and Google maps-based courses.

TECHNICAL SPECIFICATIONS

Max load **120 kg**

Max gradient **10 %**

Power output **1300^W**

Power level accuracy **± 5 %**
